居家慈怀护理

SCS Hospice Care

Singapore Cancer Society (SCS) provides holistic hospice care for patients with advanced cancer in the comfort of their own homes.

The patients we serve wish to receive home palliative care and are suitable to receive it. We accept patients through doctors' referrals.

Our SCS Hospice Care team comprises of Medical and Allied health professionals who make regular visits to our patients and their families to provide:

■ Clinical Assessment and Treatment

During home visits, we assess the needs of patients, their caregivers, and their families. We also provide help in managing symptoms like pain and breathlessness as well as teach caregivers how to care for their loved ones.

■ Psychosocial Services

We support patients and their caregivers by means of financial assistance, psychosocial, emotional, and spiritual support. We seek to accompany all our patients and their families on the cancer journey by listening to and understanding their needs as well as offering assistance and support where necessary. We also offer bereavement support to family members and caregivers in the months following the death of a patient.

■ Home Rehabilitation

Our therapists assess and train our patients and their caregivers on exercises aimed at maintaining their function in day to day activities. Home rehabilitation also includes home modification and caregiver training.

■ Loan of Equipment

We loan equipment such as oxygen concentrators and syringe drivers as well as rehabilitative equipment such as wheelchairs, commodes, and walking aids to our patients.

Welfare & Cancer Support Services

This one-time financial assistance scheme aims to alleviate the financial burden of newly-diagnosed cancer patients who come from low or middle income families within the first 6 months of their diagnosis of cancer.
